

What is claimed

1. A trim panel insulator for a vehicle, comprising:  
a nonlamine acoustical and thermal insulating layer of  
5 polymer fiber selected from a group consisting of polyester, a combination  
of polyester and fiberglass, polypropylene and any mixtures thereof.
2. The insulator of claim 1, including a relatively high density,  
nonlamine skin of polymer fiber along at least one face of said acoustical  
10 and thermal insulating layer.
3. The insulator of claim 3, including a first facing over a first  
face of said acoustical and thermal insulating layer, said first facing layer  
being constructed from a material selected from a group consisting of  
15 polyester, rayon, polyethylene, polypropylene, ethylene vinyl acetate,  
polyvinyl chloride, fibrous scrim, metallic foil and mixtures thereof.
4. The insulator of claim 4, including a second facing layer over  
a second face of said acoustical and thermal insulating layer.  
20
5. The insulator of claim 4, wherein said acoustical and thermal  
insulating layer has a density of between about 20-130 g/ft<sup>2</sup>.
6. The insulator of claim 5, wherein said acoustical and thermal  
25 insulating layer and said first facing layer are approximately the same color.
7. The insulator of claim 5, wherein said acoustical and thermal  
insulating layer, said first facing layer and said second facing layer are  
approximately the same color.
